CHICAGO**

PRESIDENT'S REPORT 1938-1939

This is St. Luke's seventy-fifth anniversary as a non-profit hospital serving the sick, injured and suffering of Chicago. The pages that follow tell the story of St. Luke's accomplishments in some detail. But no compilation of statistics can truly picture the lives saved, the suffering relieved, and the hundreds of families, rich and poor alike, made happy through the work of the Hospital.

Just as statistics alone cannot tell the full story of a hospital's service, neither can a balance sheet properly appraise its most valuable assets. We have gathered together on our Staff doctors, nurses and technicians that form a distinguished medical group known throughout the country. We have modern equipment available which enables this group to serve not only the people of Chicago but to make advances in medical knowledge and science.

Today, however, the Hospital needs many things to maintain its excellent standing and prepare itself for the greater tasks which it must inevitably meet tomorrow. To this end we have already made plans for the building of a "Greater St. Luke's."

One of the greatest immediate needs in St. Luke's proposed long-range building program is an enlarged School of Nursing, of which the most urgently needed unit is a new Nurses' Residence. This new Nurses' Residence should provide housing, educational and recreational accommodations for our student and graduate nurses. Upon its completion, two floors of Main Building now housing students would be available for much needed additional ward space to accommodate patients unable to pay more.

The School of Nursing teaches care of the sick, prevention of sickness, and the principles of good health. In their three-year period of education, students are given courses in the basic medical sciences that in many ways are better and more thorough than those given to the medical student of a generation ago.

Another of St. Luke's needs is a Service Building which would house all administrative offices, medical services, residents' and internes' quarters, centralized kitchens and dining rooms and coordinate duplicated departments.

The Hospital's free work also needs to be extended if St. Luke's is to maintain its high educational standard. The first requirement for such extension is a new Out-Patient Building.

Presupposing that St. Luke's plans become buildings and improvements, the Hospital will need dollars to operate them. Operating at a deficit with the present plant, how shall the Hospital care for more out-patients, extend free hospital service, and broaden educational facilities? The answer lies in one word: Endowment.

St. Luke's needs \$3,764,636 to bring its endowment to a minimum requirement of \$5,000,000. This will enable us to serve the community and the cause of medical education as they should be served by this Hospital.

None can foresee all the obstacles to the accomplishment of these aims, and none can foretell the time the program must take. Yet the program must be undertaken.

St. Luke's proudly and gratefully points to its ever-increasing number of friends whose gifts have made possible the Hospital of today. To every person connected with the Hospital I wish to express my gratitude and appreciation for serving so loyally and so well. I want especially to thank the Board of Trustees, The Women's Board and the Medical Staff for their devoted interest to the welfare of the Hospital. Their splendid example has marked the path to be followed toward the Greater St. Luke's.

REPORT OF THE SCHOOL OF NURSING AND DEPARTMENT OF NURSING SERVICE

Our student enrollment on December 31, 1938, was: 177 clinical students and 56 preclinical, making a total of 233 student nurses. On December 31, 1937, the student enrollment was 225. The average number of general duty nurses employed was 55.

On February 16, 1938, A Floor was converted into a Psychiatric Department with a staff of 7 graduate nurses, 1 orderly, 1 maid, and an average of 6 students. The student nurses are now given two months experience in the psychiatric department with class instruction in the Principles of Neurology, Principles of Psychiatry and Principles of Psychiatric Nursing.

In the autumn of 1938, it was decided to reestablish affiliations for Communicable Disease Nursing for our students and for a limited number of students in Public Health Nursing. These affiliations were arranged with the Municipal Contagious Disease Hospital, the Cook County Hospital School of Nursing and the Visiting Nurse Association of Chicago.

In order to cover the staffing of the general floors affected i.e. Smith 2, 3 and 4, also, Main 6, 7, 11, 14, 15 and 17, it was agreed that two maids be employed by the nursing service as ward helpers on the respective floors.

During the year the Medical Board continued their able and generous contributions to the educational program of the school for which the school wishes to express their sincere appreciation.

The generosity of the Woman's Board, the Board of Trustees and the Hettler Fund augmented and enriched the program of the social activities for the student nurses. The Woman's Board, also, financed the summer quarter at Chicago University for one of our faculty members.

Mrs. Janet Fenimore Korngold, Director of the School resigned October 25, in order to join her son in California. Miss Madeleine McConnell was appointed to follow Mrs. Korngold as Director, and will take office January ninth, 1939.

Respectfully submitted,
JOSEPHINE GILBERT
Assistant Director

TO THE BOARD OF TRUSTEES OF
ST. LUKE'S HOSPITAL:

We have made an examination of the balance sheet of ST. LUKE'S HOSPITAL (an Illinois corporation organized not for profit) as at December 31, 1938 and of the statement of income and expenses for the year ended that date. In connection therewith, we examined or tested accounting records of the hospital and other supporting evidence and obtained information and explanations from officers and employees of the hospital; we also made a general review of the accounting methods and of the operating and income accounts for the year. Our detailed audit was limited to test-checks of certain transactions mainly for one month of the year.

The accompanying statements reflect the segregation of assets of the various funds as recorded on the books of the hospital during the year 1934. This segregation was made by officials and counsel of the hospital after a study of the available documents relating to bequests and endowments. Our examination did not include a review of these documents.

In our opinion, based upon such examination, the accompanying balance sheet and related condensed statement of income and expenses, subject to the notations thereon, fairly present, in accordance with accepted principles of accounting consistently maintained by the hospital during the year under review, the financial position of the hospital at December 31, 1938 and its income and expenses for the year ended that date.

ARTHUR ANDERSEN & CO.

Chicago, Illinois,
April 22, 1939.

ST. LUKE'S HOSPITAL
(An Illinois Corporation Organized Not for Profit)
BALANCE SHEET—DECEMBER 31, 1938

Amount due general and plant fund.....	\$ 469.64	
Endowment fund balance, per accompanying summary		<u>1,226,012.46</u>
Total endowment fund and liabilities thereof		<u>1,226,482.10</u>
		<u>\$6,003,981.62</u>

NOTES:

- (1) The reserve for depreciation of buildings includes provisions for depreciation only up to and including the year 1912; no provisions have been recorded on the books subsequent to that year.
- (2) Investments are stated at amounts carried on the books without regard to the decrease which would occur were such assets recorded at the lower of book values or market.
- (3) Bonds having a book value of \$19,600.00 (quoted market value \$23,000.00) and cash of \$21,258.69 included in the endowment fund assets are also recorded on the books and balance sheet of the Linen Committee as assets of that organization. Other than these bonds and cash, assets of organizations which function in connection with the activities of the hospital are not included in the above balance sheet.
- (4) Uncollected subscriptions to the Greater St. Luke's Campaign Fund, in the aggregate amount of \$56,398.93 as shown by the records of the hospital, are not included in the above balance sheet.

ST. LUKE'S HOSPITAL
CONDENSED STATEMENT OF INCOME AND EXPENSES
FOR THE YEAR ENDED DECEMBER 31, 1938

PARTICULARS	Amount
OPERATING REVENUES:	
Board and room of patients.....	\$545,410.19
Departmental services	303,466.14
Total operating revenues	<u>\$848,876.33</u>
OPERATING EXPENSES:	
Professional expenses	\$463,534.13
Nonprofessional expenses	310,246.51
Training school for nurses.....	<u>113,828.12</u>
Total operating expenses.....	<u>887,608.76</u>
Net operating deficit, before provisions for depreciation, amortization, etc...	 \$ 38,732.43
NON-OPERATING INCOME:	
Income from endowment fund and unrestricted investment fund assets.....	\$ 46,615.06
Less—Cash income for annuity and other desig- nated purposes	<u>8,222.17</u> \$ 38,392.89
Income from Daniel B. and Louise M. Shipman Charity Trust Fund.....	9,023.06
Donations, exclusive of \$1,361.40 received for spe- cial funds and \$21,439.22 for capital purposes	21,143.75
Store rentals, discounts, etc.....	<u>2,959.52</u>
Total nonoperating income.....	<u>71,519.22</u>
	<u>\$ 32,786.79</u>
PROVISIONS FOR DEPRECIATION, AMORTIZATION, ETC.:	
Provision for depreciation of equipment—see Note 1	\$ 34,800.00
Amortization of deferred building rehabilita- tion expenses	21,000.00
Provision for doubtful accounts.....	18,148.42
Interest on mortgage note.....	15,000.00
Provision for real estate taxes on vacant Indiana Avenue property	<u>1,485.35</u>
Total non-operating expenses.....	<u>90,433.77</u>
Net deficit	<u><u>\$ 57,646.98</u></u>

NOTES:

- (1) The net deficit, as shown above, has been determined after deducting a provision of \$34,800.00 for depreciation of hospital equipment but no provision for depreciation of buildings has been made by the hospital.
- (2) Income and expenses of organizations and committees which function in connection with the activities of the hospital are not included in the above statement.

HENRY BAIRD FAVILL LABORATORY 1938

The number of routine tests completed in the Henry Baird Favill Laboratory since 1925 and the gradual yearly increase is illustrated by the following graph.

This steady growth shows that greater demands for all kinds of routine examinations are found necessary in the care of patients in the hospital. While most of the increase is in the clinical laboratory tests for patients, some has resulted because of tests to determine the efficiency of sterilizing procedures in the operating rooms, the quality of the milk products used in the hospital, and the maintenance of health measures among the student nurses. The number of tests made annually by the Social Service Laboratory has ranged between 11,500 and 14,910. The State Board of Public Health has certified the laboratory in serological tests and bacteriological examinations for venereal diseases and in the typing of pneumococci in the serum

treatment of patients with these infections, especially pneumonia. This certification was granted on the basis of inspection of equipment and personnel and on the results with test samples submitted for examination.

The following table summarizes the routine examinations completed during the year 1938:

Red and white blood counts, and hemoglobin estimations.....	40,651
Blood coagulation tests.....	1,198
Differential blood counts.....	2,673

Research investigations have been continued in the laboratory as in other years. Paul J. Hartsuch (Ph. D. Kent Chemical Laboratory) held the Seymour Coman Fellowship in the Chemistry Department of the University of Chicago until September 1, 1938 when he resigned to accept an appointment in the Department of Chemistry of the College of the Central Y. M. C. A. His investigations on the purification of oleic acid were completed. Mr. Sidney Weinhouse (Ph. D. Kent Chemical Laboratory) was appointed his successor. Doctor E. D. Zeman, the John Jay Borland Fellow in Medicine, resigned on January 15, 1938 to accept a position as pathologist for a group of hospitals at and near Belleville, Illinois. Doctor Leslie Grams was appointed to this vacancy. The experimental work of Dr. O. O. Christianson on arterial lesions with fats and soaps has been supported by this fellowship fund. This study was completed by Dr. Christianson in conjunction with the Department of Pathology of the University of Alabama. The Winfield Peck Memorial Fund has been available, through

Doctor J. A. Capps, for the support of investigations in infections, pathological tissues, and experimental pathology. The Albert B. Kuppenheimer Fund has aided Doctor John I. Brewer in studies of small human embryos and the fragility of capillaries in the skin.

The following publications from the laboratory were completed during the year 1938:

EDWIN F. HIRSCH:

"Arterial Occlusion with Aseptic Necrosis of Bone."
Arch. Surg. 37: 926-943, 1938.

OSCAR O. CHRISTIANSON:

"Experimental Lesions of Arteries with Human Fat, Fatty Acids, Soaps and Cholesterol."
Arch. Path. In print.

EDWIN F. HIRSCH and BRUCE M. BROWN:

"Myoblastic Sarcoma of the Urinary Bladder."
Arch. Surg. 37: 562-569, 1938.

PAUL J. HARTSUCH:

"The Preparation of Purified Oleic Acid."
J. Am. Chem. Soc. In print.

FRANK W. VAN KIRK and EUGENE A. EDWARDS:

"Hypernephroma of the Ovary."
Am. J. Cancer. In print.

JOHN I. BREWER:

"Rhythmic Changes in the Skin Capillaries and their Relation to Menstruation."
Am. J. Obst. and Gyn. 36: 597-610, 1938.

EDWIN F. HIRSCH:

"Experimental Tissue Lesions with Mixtures of Human Fat, Fatty Acids, Soaps and Cholesterol."
Am. J. Cl. Path. In print.

EDWIN F. HIRSCH:

"Symmetric Hemorrhagic Necrosis of the Cerebrum Following Primary Thrombosis of the Superior Longitudinal Sinus."
Arch. Path. 26: 210-215, 1938.

EDWIN F. HIRSCH and RUSSELL H. MORGAN:

"The Causal Significance to Traumatic Ossification of the Fibro-cartilage in Tendon Insertions."
Arch. Surg. In print.

JOHN I. BREWER:

"A Human Embryo in the Bilaminar Blastodisc Stage (The Edwards-Jones-Brewer Ovum)."
Contributions to Embryology, No. 162. Publication No. 496 of Carnegie Institution of Washington, pp. 85 to 93, May 31, 1938.

The laboratory acknowledges again with gratitude, the support received from various sources.

Respectfully submitted,

EDWIN F. HIRSCH, Ph. D., M. D.,

Director

TUMOR STUDY GROUP

The Tumor Study Group of St. Luke's Hospital has functioned for five years. It is made up of surgeons, internists, pathologist, roentgenologist, radiologist and a representative from each of the special services, viz., orthopedics, ear, nose and throat, genito-urinary, dermatology, neurology and pediatrics. The group has met every Friday morning for the purpose of studying free or private patients suspected of having a malignancy. The purpose of this group is to arrive at a definite diagnosis and best line of treatment. In cases of malignancy, postoperative or following irradiation treatment, patients are seen once a month for the first year; every two months the second year; every three months the third year, etc. In this manner recurrences are detected early and patients are referred back to original service for further treatment.

The Gynecological Department has maintained its own Tumor Study Group and certain types of cancer found in gynecology have been presented before the main Tumor Group body. The combined efforts of both these groups has made St. Luke's Hospital one of the crucial centers of the country in the nation's fight against cancer.

Examination and treatment of 337 cancer cases have been arranged for. Approximately the same number of cases were examined, treated and followed up by the Gynecological and X-ray Department. A recent survey of the hospital shows that the number of malignant cases treated at St. Luke's is equal to and surpasses that of most hospitals of its size.

Group study of every case of malignancy has been made compulsory in all dispensary and ward cases and is desired for all private patients. Records of all malignancy cases will be kept on a uniform blank as Tumor Group data. Physicians and surgeons desiring the help of this Tumor Group are invited to attend the meetings of this Group every Wednesday morning at 9 o'clock. Work of the Tumor Group is confined to malignancies only.

ANNUAL REPORT OF THE PRESIDENT OF THE WOMAN'S BOARD OF ST. LUKE'S HOSPITAL

The Founding of St. Luke's Hospital was inspired by a sermon preached by Dr. Clinton Locke, Rector of Grace Church, in the year 1864.

A small group of women formed St. Luke's Aid Society and undertook to raise money to equip this first hospital.

This band of pioneering women established a spirit which prevails today, — seventy-five years later.

During these many years these interested women have exhausted every method for raising money for the Hospital, culminating in the Twelfth Annual Fashion Show of 1938, which netted \$31,349.28, making a total for the twelve years of \$343,190.57.

The Social Service Department, our major activity, took care of 60,384 clinical visits during the year.

We undertook the furnishing and decorating of thirty-three rooms in Smith Memorial, financed from funds of The Woman's Board and gifts from individual members and friends. We are indebted to Mrs. Ogden Armour, Mrs. John W. Gary, Mrs. Charles F. Glore, Mrs. Huntington B. Henry, Mrs. Frank P. Hixon, Mrs. Charles H. Morse, Mrs. John G. Shedd, The Woman's Auxiliary of the Medical Board and the family of the late Dr. L. L. McArthur.

Mrs. Korngold's resignation as Director of Nurses was accepted with deep regret, but we are happy to welcome Miss Madeleine McConnell as her successor. Miss McConnell is herself a graduate of St. Luke's School of Nursing.

In November a Special Meeting was held for the purpose of increasing the Active Membership of The Woman's Board from sixty to sixty-five. Mrs. Lester E. Frankenthal and Mrs. Edmund D. Hulbert were transferred from Active to Senior Membership. Miss Lyla Woodruff was elected to Active Membership. The Board now consists of Three Honorary Members, Three Senior Members and Fifty-eight Active Members, with seven vacancies.

The Woman's Board, and individual Members of the Board, gave to the Hospital the sum of \$41,398.62 during 1938.

The Woman's Board is what it is because of the loyal and untiring efforts of each member, and I extend my everlasting gratitude to you all.

Respectfully submitted,

EMILY LYON GARY

President

The Woman's Board of St. Luke's Hospital.

January 23, 1939.

ANNUAL REPORT OF
THE OCCUPATIONAL THERAPY DEPARTMENT
OF ST. LUKE'S HOSPITAL
JANUARY 1, 1938 to DECEMBER 31, 1938

RECEIPTS

Balance on Hand January 1, 1938.....	\$ 852.68
Received from Woman's Board January 6, 1938.....	1,500.00
From Hospital for Mrs. Abbey's salary.....	591.66
From Hospital for Miss Vetting's Salary	240.00
From Hospital for Mrs. Sipple's salary.....	50.00
From Hospital for Materials for Patients.....	148.22
	<u>\$3,382.56</u>

EXPENDITURES

Materials and equipment (Board Funds).....	\$ 34.47
Materials (Hospital) Twelve Months' 1938.....	148.22
Salaries to Personnel.....	2,778.04
	<u>2,960.73</u>
Balance on Hand December 31, 1938.....	\$ 421.83

NUMBER OF PATIENTS:

- 136 Hospitalized patients came to Shop and spent 1407 hours in Shop.
- 162 Out-patients came to Shop and spent 965 hours in Shop.
- 90 Patients received bedside occupational therapy.
- 2711 calls were made in wards, subrooms and private rooms and approximately 1000 hours were spent on these calls.
- 388 Patients given curative treatment.

TYPES OF CASES

- 216 Orthopedic cases
- 52 Spastic cases
- 20 Surgical cases
- 87 Neurological cases
- 13 Medical cases

ANNUAL REPORT
SOCIAL SERVICE DEPARTMENT
ST. LUKE'S HOSPITAL

1938

In the year 1938 visits to our Clinics totalled 60,384. Approximately 2,074 patients were rejected for the following reason:

518 were referred back to private physicians; 2074 were rejected because the family could not pay a private physician's fee; were contagious diseases, outside geographical area, or referred back to clinic where they previously registered.

Our Medical Clinic with 18 physicians. 11,881 visits were made. There were 150 Diabetic patients. Cardiacs, all new patients admitted are first diagnosed. The function of the Medical Clinic is handicapped by the difficulty in hospitalizing patients who are not able to pay the ward rate, when diagnostic studies or hospital treatment is indicated.

The Orthopedic Clinic has ten staff doctors in attendance. More than a half of the clinic patients are children and are registered in one of the six special crippled children's schools. Clothing has been purchased from our Clothing Fund. Braces and other appliances have been furnished by our department. Many of our children are privileged to attend the Crippled Children's Camps.

The Neuro-Psychiatric Clinic meets five days a week with six doctors in attendance. 2,023 visits were made during the past year. An attempt has been made to differentiate between organic and functional cases—and assigned to the doctor specializing in each field.

The Dermatology Clinic treats patients of two groups—skin diseases and syphilis. In the past year 8,030 visits were made.

The Pediatric Clinic cared for 944 new patients, or 8,773 visits. The three convalescent homes were most helpful in caring for our children. 64 new cardiac children were registered.

The Surgical Clinic is held daily. It is staffed by 21 surgeons. 5,320 visits were made and 253 patients hospitalized.

The Urology Clinic holds four sessions a week with five urologists in charge. 2042 patients were given care in this clinic.

The Gynecology Clinic has been conducted with four clinics each week, with eight staffmen. 5171 clinic visits were made. Many active carcinoma cases are under observation and being cared for.

The Obstetrical Clinic saw a total of 606 patients with a total number of visits of 4,340.

The Ear, Nose and Throat Clinic is held five times weekly with seven staff members in attendance, with 3911 visits.

The Peroral Endoscopy meets twice weekly on Main 10. Many of our patients attending this clinic required operative procedures—including removal of many pins and foreign bodies.

The Clinic Dietitian has averaged about 300 patients a month. These may be classified in thirty groups depending on the type diet. The majority were reduction diets, diabetic and ulcer. Fifty five per cent of the clients were on relief, so diets were made low in cost in accordance with the relief administration.

Miss Irene Stolp is our Teaching Supervisor of Student Nurses. The education of the student was greatly increased in scope and improvement in quality during their stay in the Social Service Department.

The Helen Shedd Reed Fund is used at the request of the doctor to provide private nurses to very ill free patients.

The Gray Ladies of the Red Cross have contributed great skill and conscientious services in the many departments of the hospital.

The Medical Staff of the Hospital has built up a tradition of unselfish devotion to the Social Service Department in conducting the clinics and we wish them to know our deep gratitude.

To Mr. Wordell, who has handled our many problems with the greatest tactfulness and skill, we extend our deep appreciation.

The personnel of the Department and its great number of patients join with us in expressing our great indebtedness to Miss Armstrong. We express our deep and affectionate gratitude to her.

Respectfully Submitted,

MRS. MARGUERITE P. WOLF

ANNUAL REPORT OF THE ST. LUKE'S HOSPITAL SCHOOL OF NURSING AND NURSING SERVICE FOR THE YEAR 1939.

The Nursing Council held six meetings during the year. Dean Duncan H. Browne, chairman, Mrs. Chauncey B. Borland, Mrs. John W. Gary, Dr. H. O. Jones, Mrs. Gordon Lang, Miss Edna Lowe, Mrs. Charles H. Morse, Mrs. George A. Ranney, Miss Mary E. Westphal, Miss Madeleine McConnell, Mr. Charles A. Wordell constituted the membership. Important actions of the Council were:

1. Recommendations to the Woman's Board that a Social Health Director be appointed on the faculty of the School of Nursing. The Woman's Board approved the action and agreed to pay the salary necessary for the position.
2. The Nursing Council requested that the Committee on Accrediting of the National League of Nursing Education place our school on their list for a visit for the purpose of accreditation. This request was submitted to the Board of Trustees and approved.
3. A scholarship was awarded for the summer term to Miss Irene Stolp, supervisor in charge of Student Nurse Instruction in the Out-Patient Department, for the purpose of advanced study at Teacher's College, Columbia University.
4. Weekly Chapel service at a quarter past seven on Wednesday evening was approved as a definite part of the School Program. Services conducted by Father Travis started with the beginning of the school year in October. Following the service a short School Convocation was held when important announcements were given to the Student Group.
5. A change in uniform for student nurses was also inaugurated when the new class entered the first of October. Black shoes and stockings were discarded in favor of white. The students were delighted, and all members of the Hospital Family congratulated them on the enhanced beauty of the school uniform.

Nineteen Hundred Thirty-Nine brought many developments in the School of Nursing. In February affiliations were reestablished for our senior students. Arrangements were made for half of the class to have a two month's affiliation in Contagious Disease Nursing with the Municipal Contagious

Disease Hospital School of Nursing, and the remaining half to have a three month's affiliation with the Cook County Hospital School of Nursing; a selected group of twenty-four from among the students assigned to the Municipal Contagious Disease Hospital School of Nursing were, also, given the privilege of a two month's affiliation in Public Health Nursing with the Visiting Nurse Association of Chicago.

Our School arranged with Professor Helen Koch, Director of the Nursery School at the University of Chicago for our student nurses as they enter their period of study in our pediatric department, to have a week's period of observation on the care of the healthy child at the University Nursery School.

As standards of Nursing Education increase to the end that safe nursing care may be assured the patient, it has become advisable for our Faculty to increase their educational qualifications. Two of our staff were on leave of absence to attend summer school, and our assistant director in charge of nursing service, was at Columbia for the school year beginning in October, twelve faculty members were carrying part time work at universities in the city.

The Health Program for the School, under the leadership of Dr. Fred E. Ball, chairman of our Medical Health Committee and of Miss Hettie Gooch, Social Health Director, and the assistant director, Miss Margaret McArdle, was carefully analyzed and set up with a few additional preventive health measures which were approved by the Nursing Council. It was also arranged that chest x-rays be taken for all graduate staff nurses.

A qualified librarian was added to the faculty in the middle of September. Formerly the Nursing Arts Instructor had had two young assistants, with no change in the budget one experienced assistant was appointed to the Nursing Arts Department and the other assistant was replaced by a full time librarian. Formerly the full time faculty members had contributed time and effort to the management of the library.

Our Nursing Service also took part in a number of changes during the year. The obstetrical department was moved July 22nd into beautiful new quarters on Smith 5, with increased bed capacity it was necessary to add to our nursing staff. On October 30th our psychiatric department, which had been housed in small quarters on the first floor of the Smith Memorial Building, moved to a completely rebuilt department on Smith 6. Here the capacity was doubled, the furnishings and decorating were completely modern and designed to aid in hastening the recovery of the patient. All the most modern

equipment for treatment was also installed. With the increase in space our census practically doubled and continued to remain at a high level. Our former head nurse in the psychiatric department became our supervisor and instructor, also, it became necessary to add to our members of the graduate staff.

Early in the year when the senior students started on their affiliations we introduced maids on the nursing service in our large wards. These maids were carefully selected and carry on non-nursing duties under the supervision of the head nurses and supervisors. This service has become a substantial supplement to our nursing staff.

Appointments:

Director of the School of Nursing and Nursing Service, January 1939,
Madeleine McConnell.

Assistant Director in Charge of Social Welfare and Health, September,
1939, Hettie Gooch.

Supervisor and Instructor in Psychiatric Nursing, September, 1939,
Paula Fenimore.

Librarian to the School of Nursing, September 1939, Mary Paris.

Anna C. Armstrong, Director
Walter Reed Hospital, Washington, D. C.

KINDERGARTEN DEPARTMENT

Pauline Anne Turpin

TO THE TRUSTEES OF
ST. LUKE'S HOSPITAL:

We have examined the balance sheet of ST. LUKE'S HOSPITAL (an Illinois corporation organized not for profit) as of December 31, 1939 and the statements of income and expenses and changes in funds for the year ended that date. In connection therewith, we have examined or tested accounting records of the hospital and other supporting evidence and have reviewed the system of internal control and the accounting procedures of the hospital by methods and to the extent we deemed appropriate. Our detailed audit was limited to certain work in connection with receivables, payrolls and investments.

The accompanying statements reflect the segregation of assets of the various funds as recorded on the books of the hospital during the year 1934. This segregation was made by officials and counsel of the hospital after a study of the available documents relating to bequests and endowments. Our examination did not include a review of these documents.

In our opinion, the accompanying balance sheet and related statements of income and expenses and changes in funds, subject to the notations thereon, fairly present the financial position of St. Luke's Hospital at December 31, 1939 and the results of its operations for the year ended that date, in conformity with generally accepted accounting principles maintained by the hospital on a basis consistent with that of the preceding year.

ARTHUR ANDERSEN & CO.

Chicago, Illinois,
April 9, 1940.

ST. LUKE'S HOSPITAL
(An Illinois Corporation Organized Not for Profit)
BALANCE SHEET—DECEMBER 31, 1939

Total endowment fund and liabilities thereof			<u><u>\$1,235,363.81</u></u>
			<u><u>\$5,983,352.11</u></u>

NOTES:

- (1) The reserve for depreciation of buildings includes provisions for depreciation through the year 1912 only; no provisions have been recorded on the books subsequent to that year.
- (2) Investments are stated at amounts carried on the books without regard to the decrease which would occur were such assets recorded at the lower of book values or market.
- (3) Bonds having a book value of \$40,808.89 (quoted market value \$42,151.00) and cash of \$49.80 included in endowment fund assets are also recorded on the books and balance sheet of the Linen Committee as assets of that organization. Other than these bonds and cash, assets of organizations which function in connection with the activities of the hospital are not included in the above balance sheet.
- (4) Uncollected subscriptions to the Greater St. Luke's Campaign Fund, in the aggregate amount of \$55,398.93 as shown by the records of the hospital, are not included in this balance sheet.

ST. LUKE'S HOSPITAL

†Includes patients moribund at time of admission.

HENRY BAIRD FAVILL LABORATORY

The service rendered patients in modern hospitals has been improved and extended commensurate with advances in medical practice. While all departments of St. Luke's Hospital participate in these changes, the demands for laboratory examinations rise each year to a new high level. This increase is not restricted to any special form of examination, but is spread over all. Important with this increased volume of work is the maintenance of a high standard of accuracy and quality of service. Part of this is reflected in the certification of the Henry Baird Favill Laboratory by the Illinois State Department of Public Health for the serological tests and bacteriological examinations of venereal diseases and for the typing of pneumococci in the treatment program of pneumonia.

The following table summarizes the kinds and number of examinations completed during the year 1939:

Red and white blood counts, and hemoglobin estimations.	41,493
Blood Coagulation tests.	1,387
Differential blood counts.	3,180
Blood typings	2,007
Gastric analyses	1,140
Stool analyses	3,681
Urinanalyses	19,398
Stool examinations for amoeba.	3,092
Bacterial examinations	9,389
Widals	48
Blood cultures	267
Typhoid vaccines released	590
Guinea pig autopsies.	58
Milk and cream examinations.	494
Blood Wassermann tests.	2,692
Spinal fluid examinations.	438
Blood compatibility tests.	734
Chemical examinations	8,768
Surgical tissues	4,694
Postmortem examinations	212
TOTAL.	103,762

SOCIAL SERVICE DEPARTMENT LABORATORY

Red and white blood counts, and hemoglobin estimations.	5,038
Differential blood counts.	514
Gastric analyses	73
Stool analyses	300
Urinanalyses	7,502
TOTAL.	13,427

The program of research in the laboratory has been continued. Sidney Weinhouse (Ph. D. Department of Chemistry, University of Chicago) held the Seymour Coman Fellowship in the Department of Chemistry of the University of Chicago. His studies concerned the relation of various lipids of the blood to the development of arteriosclerosis. Doctors Leslie R. Grams and Russell H. Morgan shared the Borland Fellowship appointment. Doctor Morgan resigned December 31st to accept an appointment in the

Department of Radiology at the University of Chicago. Doctor O. O. Christianson, under this fund in conjunction with the Department of Pathology at the University of Alabama has continued studies in the metabolism of lipids. The Winfield Peck Memorial Fund, administered through Doctor J. A. Capps, has supported investigations in pathology and infections. The Albert B. Kuppenheimer Fund has aided Doctor Brewer in his studies on the fragility of the capillaries of the skin and other studies in gynecology.

The following contributions have been published or prepared in the laboratory during the year 1939:

SIDNEY WEINHOUSE and EDWIN F. HIRSCH:

"Chemistry of Atherosclerosis I. Lipid and Calcium Content of the Intima and of the Media of the Aorta with and without Atherosclerosis."

LESLIE R. GRAMS:

"Intra capillary Microscopic Metastatic Mammary Gland Carcinoma of the Lungs and other Viscera."

Arch. Path. 28: 865-869, 1939.

HAROLD O. JONES and JOHN I. BREWER:

"The Arterial Phenomena Associated with Uterine Bleeding in Tubal Pregnancy."

Am. J. Obst. and Gynec. 38: 839-859, 1939.

F. W. VAN KIRK, JR. and E. A. EDWARDS:

"Hypernephroma of the Ovary."

Am. J. Cancer 37: 209-215, 1939.

EDWIN F. HIRSCH and RUSSELL H. MORGAN:

"Causal Significance to Traumatic Ossification of the Fibrocartilage in Tendon Insertions."

Arch. Surg. 39: 824-837, 1939.

OSCAR O. CHRISTIANSON:

"Observations on Lesions Produced in Arteries of Dogs by Injection of Lipids."

Arch. Path. 27: 1011-1020, 1939.

PAUL J. HARTSUCH:

"A Study of the Methods of Separation of Oleic Acid from Saturated Acids and Linoleic Acid with Observations on the Preparation of Oleic Acid."

J. Am. Chem. Soc. 61: 1142-1144, 1939.

RUSSELL H. MORGAN AND SIDNEY WEINHOUSE:

"An Improved A. C. Photoelectric Colorimeter."

J. Lab. and Clin. Med. In print.

RUSSELL H. MORGAN and SIDNEY WEINHOUSE:

"An Inexpensive Portable Photoelectric Clinical Colorimeter."

J. Clin. Path. In print.

R. M. BOLMAN:

"Dystrophic Calcification of the Myocardium with Chronic Nephritis."

Arch. Path. In print.

SIDNEY WEINHOUSE AND EDWIN F. HIRSCH:

"Atherosclerosis. II. The Lipids of the Serum and Tissues in Experimental Atherosclerosis of Rabbits."

Arch. Path. In print.

JOHN I. BREWER:

"Kraurosis and Leucoplakia of the Vulva."

Ill. Med. Jour. 1: 26, 1940.

JOHN I. BREWER:

"Structure of a Normal Human Embryo in the Primitive Streak Stage (The Jones-Brewer I Ovum)."

Contributions to Embryology. In print.

JOHN I. BREWER:

"The Management of Functional Uterine Bleeding."
South Side Medical Assembly Journal. In print.

The laboratory is grateful also to friends and associates who have contributed in maintaining an effective organization.

Respectfully submitted,

EDWIN F. HIRSCH, Ph. D., M. D.

ANNUAL REPORT OF THE PRESIDENT

The Woman's Board opened St. Luke's Shop, in the Hospital, in April, 1939. This required an investment of \$7000, which was turned over to the Shop Committee for decorating, equipment, changes in plumbing, etc. The shop has operated for nine months at a profit of \$531.63, or approximately 7½% on the investment. This is the greatest speculative venture that The Woman's Board has ever made with its funds. We have been told that a new business seldom shows a profit the first year. When the Trustees gave us the space in the building we agreed to turn over to the Hospital whatever revenue accrued from this venture, but it was also agreed with the Trustees that The Woman's Board would first be reimbursed for its original investment of \$7000. Although the revenue to St. Luke's may not materialize until some time in the future, in the meantime, the shop is a valuable asset in the service it renders to the Hospital and to its patients.

In January of last year the Hixon Foundation (Mrs. Hixon and Mrs. Glore, members of The Woman's Board) gave \$20,000 to the Hospital for the Rehabilitation Fund.

Our Annual Fashion Show netted \$28,591.59 in 1939.

We have carried on the activities of our many committees. The major activity, our Social Service Department, reports 58,498 clinical visits.

The Furnishing Committee has cooperated with the Trustees in the rehabilitation of many rooms in the Hospital.

During the year we transferred Miss Anita Blair, Mrs. John B. Drake, Jr. and Mrs. William H. Mitchell from Active to Associate Membership. Mrs. James H. Douglas, Jr. resigned from the Board. We have elected nine members, Mrs. John D. Ames, Mrs. Everett C. Brown, Mrs. Herbert J. Campbell, Mrs. George S. Ebbert, Mrs. Richard K. Juergens, Mrs. Gordon P. Kelley, Mrs. Cushman Kimball, Mrs. Robert Hall McCormick and Mrs. Joseph T. Ryerson. We report with regret the death of Mrs. Forsythe Sherfese, a Senior Member of our Board. Mrs. Sherfese had been a member for fifty years and was our president in 1898. Our membership consists of three Honorary, two Senior and sixty-three Active Members.

In 1939 The Woman's Board, and individual members of the Board, gave to the Hospital \$57,572.11, which amount includes the \$20,000 from the Hixon Foundation, but of course does not include the investment of \$7000 for St. Luke's Hospital Shop.

My gratitude to each member of The Woman's Board continues to grow and I wish to express my sincere appreciation to you all for your gracious and efficient aid in 1939.

Respectfully submitted,

EMILY LYON GARY

President

The Woman's Board of St. Luke's Hospital

January 22, 1940.

ANNUAL REPORT OF THE OCCUPATIONAL THERAPY DEPARTMENT OF ST. LUKE'S HOSPITAL

JANUARY 1, 1939 to DECEMBER 31, 1939

TOTAL RECEIPTS FROM THE WOMAN'S BOARD AND THE HOSPITAL

Balance on Hand January 1, 1939.....	\$ 421.83
Jan. 16 from Woman's Board.....	1,750.00
Hospital—Miss Vetting's salary.....	540.00
Hospital—Miss Sipple's salary.....	150.00
Hospital—Miss Lawrence salary.....	188.70
Hospital—Materials for patients.....	74.95
Hospital—Insurance premiums on salaries.....	13.00
Hospital—Guide Poster to Department.....	5.00

\$3,143.48

Expenditures by Hospital	\$ 971.65
Expenditures by The Woman's Board.....	204.09
Salaries	<u>1,425.00</u>
	2,600.74

Balance on Hand December 31, 1938.....\$ 542.74

NUMBER OF PATIENTS:

169 Hospitalized patients spent 1358 hours in Shop.

126 Out-Patients spent 938½ hours in Shop.

119 Patients received bedside Occupational Therapy Treatment.

414 Total number of patients treated.

TYPES OF CASES:

35 Surgical
224 Orthopedic
23 Spastic
127 Neurological
38 Medical

ANNUAL REPORT
SOCIAL SERVICE DEPARTMENT
ST. LUKE'S HOSPITAL

1939

The number of visits to our Clinic in 1939 totaled 54,498. One admitting officer interviewed 7,972 patients—5,052 were applying for the first time, 1,952 were rejected, for the following reasons: the clinic capacity had been filled, they were referred back to private physicians; returned to clinic in which they had previously received care or were outside of geographical area.

Our Medical Clinic was conducted by 17 staff physicians and three residents. A total of 10,104 visits were made. The clinic serves patients with heart trouble, diabetes, cardio vascular disturbances, leukemias, and gastrointestinal disorders. We sent 168 children to thirteen camps during the summer months.

The Orthopedic Clinic meets four times a week with eight doctors in attendance. Many adjustments for patients and families have been made by the nurses of the Infantile Paralysis Division of the Visiting Nurses' Association or Municipal Tuberculosis Sanatorium. 3,328 Clinic visits were made. Thirty-two braces were purchased, several pairs of shoes were made.

The Neuro-Psychiatric Clinic has enlarged and three new doctors have been added to the six already devoting time regularly to the clinic. It is held five days a week, of which three days are devoted primarily to organic and two to functional cases. 2000 visits were made.

The Neuro-Circulatory Clinic is a highly specialized one. Patients are referred here by doctors in all other clinics for special care.

The Pediatric Clinic had 200 more visits than in 1938. Over 650 of these are children with cardiac disorders.

The Dermatology Clinic is conducted by three dermatologists. 5,642 visits were made. One of the most important functions of this clinic is the treatment of the luetic patient and skin diseases.

The Surgical Clinic is held daily, twenty surgeons are in attendance, visits of patients totaled 5,375.

The Urology Clinic has five urologists in attendance. 2110 visits were made.

The Tumor Clinic is held once a week. All tumor cases are referred here from all other clinics to this group. As most cases are malignancies, plans have to be made for immediate treatment with careful follow-up.

The Gynecological group holds five clinics a week with 5,924 visits. When a patient is admitted to the hospital, many adjustments in the home must be made by the social worker and convalescent's care must be provided in other homes or by the Visiting Nurse.

The Obstretrical Clinic totaled 3,314 visits. 463 were hospital deliveries—the majority of patients register in the fourth or fifth month of pregnancy and return regularly for examinations as recommended by the doctor.

Many interesting pathological cases were examined in the Eye Clinic, especially glaucoma and iritis cases. Many children attending sight saving classes come to our clinic for regular check ups. Complete histories are then sent to the Illinois Society for the Prevention of Blindness, also to the school where the child attends.

The Department of Peroral Endoscopy has been very active. Over 500 operations were performed with patients from seven states. In one case a little girl two and one half years old came to the hospital with four open safety pins, 2 buttons, and one barret pin which were all extracted from her stomach.

The Dietetic Clinic had 2,966 patients registered for individual instruction—63% were relief patients.

The scope of the work of St. Luke's School of Nursing has greatly increased in the Social Service Department, gaining a wider knowledge of the health and social factors in family and community life. 74 Senior Students spent eight weeks in the Out Patient Department and made 786 home calls, each call entailed minor home nursing and individual conferences.

Through the Helen Shedd Reed Fund we have been fortunate in providing special nurses for free patients.

We wish to express our appreciation and our gratitude to the Medical Staff who have given so liberally and generously of their time to our clinics. To Mr. Wordell who on all occasions has given such prompt and willing advice whenever problems have confronted us. To our Gray Ladies, trained by the Red Cross, who have again proven their great assistance to the hospital. To Miss Armstrong, our Superintendent of the Department, the performance of her multifarious duties has shown her mastery of all factors of Social Service in the highest sense of the term—to her we state our affectionate gratitude.

Respectfully Submitted,
MRS. MARGUERITE P. WOLF

SOCIAL SERVICE DEPARTMENT ST. LUKE'S HOSPITAL

STATEMENT OF OPERATIONS FOR THE TWELVE MONTH PERIOD, ENDED

DECEMBER 31, 1939
